DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Raymond Werner on July 21, 2004.

The application has been amended as follows:

Title:

Integrated Circuit Provided With A Substrate And Memory Transponder

Drawings

New corrected drawings are required in this application because proposed corrections are approved and formal drawings are requested. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claims

Claim 7

An integrated circuit as claimed in claim 2, wherein a first patterned electrically conducting layer is present on a substrate, **wherein the bridge of the memory element and a first transistor electrode of the first transistor are disposed in the first patterned electrically conducting layer.**

Claim 10

A transponder comprising an integrated circuit **as claimed in claim 1 and further comprising an antenna** and an electrically conducting connection between the antenna.

Claim 11

A security paper comprising an integrated circuit **as claimed in claim 1.**

Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-11 are allowable because prior art does not show alone or in combination along with the limitations of the independent claim such as an electrically conducting bridge comprises an electrically conducting organic material, the bridge having both a non-programmed state and a programmed state, wherein in a non-programmed state the bridge comprises a first conduction state in which a first conduction current level flows through the organic material between the first electrode and the second electrode of the memory

element below a transition temperature, and a programmed state comprises a second conduction state in which the current level flows through the organic material by at least a predetermined amount less than said first conduction current level when the organic material is above said transition temperature, wherein the organic material is programmed by heating the memory element to said transition temperature that reduces conduction through predetermined portions thereof to.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiesha L. Rose whose telephone number is 571-272-1844. The examiner can normally be reached on M-F 8:30-6:00 off 2nd Mondays.
